Summary

I'm a software engineering student looking for challenges to use my programming knowledge and life experiences to learn and acquire new achievements. I like to analyze challenges from many perspectives to try to overcome these challenges in the most effective way, aiming for long-term success. I could add to the team with my critical thinking and different approaches.

Education

Software Engineering / Infnet RJ

April 2020 - April 2024, Rio de Janeiro - RJ (Brazil)

 - **Interaction Design**
-

Work Experiences

IBM / Software Engineer (Internship)

March 2022 - Currently, Rio de Janeiro - RJ (Brazil)

I am part of a team responsible for maintaining and updating an internal company tool and performing automatic tests. To accomplish these tasks, we use **Jenkins** and **Selenium** for the **Tests Automation**, the maintenance and update of the internal company tool, we use a mix of **Java** and **Javascript**.

TIM Brazil / Project Manager (Internship)

January 2021 - March 2022, Rio de Janeiro - RJ (Brazil)

I am working in the sector that manages projects that implement, update and modify technologies and services offered by the company. The projects are implemented with the company's own **Agile Software Development**, heavily based on **Scrum** Methodology. My role is to accompany the technical teams performing a function equivalent to Scrum master. Therefore, it is a job that consists of monitoring many projects simultaneously. To that, it is necessary to have a lot of organization and knowledge of the company workflow.

I also control the finances of the teams in the sector that I work for within the company. To perform these functions, tools like Excel, Azure, and Power BI, are used.

UFRJ / Paleontology Laboratory

June 2016 - June 2018, Ilha do Fundão, Rio de Janeiro - RJ (Brazil)

Fossil Preparation and Restoration.

UFRJ / Mineralogy Laboratory

January 2015 - June 2016, Ilha do Fundão, Rio de Janeiro - RJ (Brazil)

Minerals Cataloging Internship and Database Computerized System Implementation.

Creation and implementation of a computerized database system to index the UFRJ minerals collection. For that, tools like Microsoft Excel and Google Sheets, been used.

Virtua Server / Technical support

July 2013 - January 2014, Rio de Janeiro - RJ (Brazil)

Installation and maintenance of virtualized server hardware and software. Use of systems such as Windows Server and Ubuntu.

Sales and Customer Service. Understand the needs of each customer and offer the best solution. Customers online technical support.

IBGE / Recenseador

February 2009 - April 2009, Rio de Janeiro - RJ (Brazil)

Other Experiences

Uber / Passenger transport and tourism in Portugal

July 2019 - March 2020, Porto, Porto (Portugal)

NR35 certificate / Work at height, zipline, climbing and tree climbing

March 2016 - January 2019, Rio de Janeiro (Brazil)
